SUMMARY

Junior Full Stack Developer with a B.Sc. in Computer Science and 2-month internship experience at SIKET Bank. Skilled in MERN, Python, Django, and database management, with hands-on experience building small-scale applications, including a Bank Management System. Passionate about clean code, automation, and solving real-world problems through technology.

TECHNICAL SKILLS

Programming Languages

- Python: Strong foundation with practical experience in Django; comfortable building backend logic and APIs.
- JavaScript: Good understanding of core concepts (ES6+), DOM manipulation, and frontend scripting.
- Java: Intermediate understanding; able to write object-oriented programs.
- .SQL: Solid understanding of database queries, joins, and optimization for backend applications.

Frameworks

- Django: Proficient in developing full-stack web apps, handling authentication, models, and REST APIs.
- React: Good understanding of component-based architecture, state management, and frontend integration.
- Node.js: Familiar with server-side JavaScript, Express.js routing, and REST API creation.

Databases

- SQLite: Good experience using it for small and medium-sized projects.
- PostgreSQL: Working knowledge of relational database structure and queries.
- SQL: Good understanding of schema design and CRUD operations.

Tools

- Git: Proficient in version control, branching, and collaboration.
- GitHub: Familiar with repository management and project hosting.
- VS Code: Skilled in using extensions, debugging tools, and environment setup for development.

Other Skills

- Problem Solving: Able to analyze and break down complex coding challenges efficiently.
- API Integration: Experience consuming and integrating third-party APIs in web applications.
- Adaptability: Quick to learn new technologies and frameworks through self-study and hands-on practice.

EDUCATION

American College of Technology – Addis Ababa, Ethiopia
Bachelor of Science in Computer Science

March 2022 – August 2025

Holy Trinity Cathedral School – Addis Ababa, Ethiopia
High School (Grade 9-12)

2017 – 2021

Sent Michel Primary School – Addis Ababa, Ethiopia
Primary School (Grade 8)

2016 – 2017

Ze-Hagere Gelila Primary School – Addis Ababa, Ethiopia
Primary School (Grades 1-7)

2009 – 2016

Experience

SIKET Bank, Addis Ababa, Ethiopia

June 2025 – August 2025

Intern, Backend Development — Bank Management System

- Built a Bank Management System as the primary project, developing backend logic using Django and SQLite to manage customer accounts, deposits, withdrawals, and transaction automation.
- Gained practical experience in database management, automation, and solving real-world banking problems through hands-on application development.

Small Projects

- Hotel Review Website: Hotel review app built with HTML, CSS, and JavaScript.
- Car Shopping Website: E-commerce-style car shop made with React and mock API data.
- Course Registration System: Basic course registration platform built with Django and JavaScript.
- Telegram Web Scraper Bot: Developed a Python web scraper that collects data from websites and automatically posts updates to a Telegram channel.

INTERESTS & HOBBIES

- Coding and building personal projects
- Exercising regularly
- Watching movies
- Trying new things and experiences

LANGUAGE

Amharic - Native

English - Expert
